

GEOENGINEERING (Weather Control) means . . .

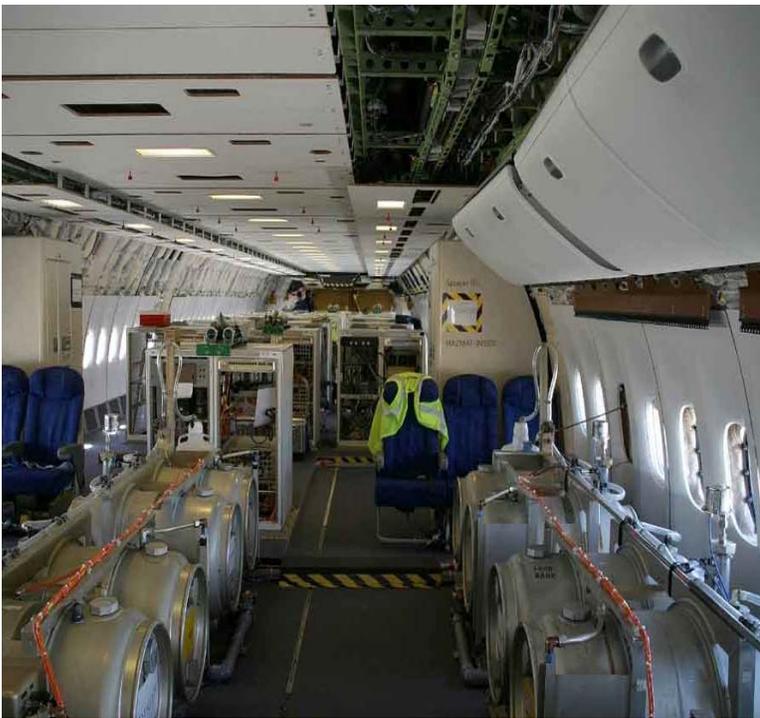

Say goodbye to . . .

Say hello to . . .

With all the talk about a clean, green environment, geoengineering (saturating our atmosphere daily with toxic chemicals) is a peculiar way to achieve it!

Geoengineers deny having deployed aerosol programs for years, yet they are currently proposing to spray 10-20 million tons of aluminum oxide with other toxic chemicals into our sky annually as stated in numerous geoengineering documents. Lab tests have disclosed extremely high levels of these metals in ground, water, rain and atmospheric tests worldwide. Blood and urine tests reveal alarming levels of aluminum, barium, strontium, cadmium and other chemicals known to cause high blood pressure, cancer, asthma, Alzheimers, heart, kidney and liver damage, osteoporosis, chronic inflammation, headaches, skin disorders, severe lung, spleen and intestinal diseases, immune system decline, blurred vision, intense ringing in the ears, muscle weakness, hair loss, etc. **NO** purpose justifies these consequences.

Wouldn't the following results be enough to stop geoengineering now?

- severe drought caused by consistent daily aerosol spraying of aluminum (a moisture-drying desiccant)
- Monsanto's drought-resistant and aluminum-resistant seeds then become a necessity because natural seeds won't grow
- destruction of forests saturated with millions of tons of aluminum known to cause the dying of trees and wildfires burning with record heat
- a shocking statement by geoengineers that they have **not** done any studies or research on the health affects of aluminum, barium or other chemicals they are proposing to spray nor plan to
- 200 species becoming extinct every single day
- massive Honeybee die-off and beached whales due to geoengineering's HAARP technology
- a 10,000%-increase in autism since 1975
